Many people and organizations were involved in making this website possible:

Organizations

The Friends of the Florissant Fossil Beds, Inc. are funding the hosting and maintenance of this website. They also sponsored the internship necessary to create much of the material presented on <http://peru.fossilbeds.org> and <http://sexi.fossilbeds.org>.

The United States National Park Service (USNPS) has hosted facilities and provided staff support as a part of their ongoing mission to conserve natural and cultural resources throughout the world.

Individuals

Lindsay Walker participated in the Geological Society of America GeoCorps America internship program at Florissant Fossil Beds National Monument in 2011 and developed the original interpretive design for this website.

Herb Meyer and Deborah Woodcock, scientists currently studying the fossils at Sexi, initiated the development of the website and provided and directed much of the content.

Mariah Slovacek and Laura Clarke created artwork reconstructing Eocene landscapes and trees of Piedra Chamana as part of their internships at Florissant Fossil Beds National Monument.

Conni O'Connor assisted with revision of the website in 2022.

Wayne Johnston, the webmaster for The Friends of the Florissant Fossil Beds, maintains this website and provided technical support during its development.

Jean Schnell photographed many of the copyrighted images appearing on this website and gave permission to use them in interpretive materials for the fossil forest.

Eleazar Rufasto reviewed the Spanish translations.

Research at the fossil forest has been supported by the American Philosophical Society (travel grant to D. Woodcock), The National Science Foundation (grant no.0403510 to D. Woodcock and H. Meyer), National Geographic Society (grant no. CP-103R-17 to D. Woodcock), and the US National Park Service.
